

Cronton Campus, Halton **New Teaching Block & Refurbishment Works**

This project involved the construction of a new 20,000 sq ft, three storey teaching block at the Cronton Campus for the Riverside College.

The new build project which links to the existing college building on the ground and first floor levels consists of a large open plan Learning Resource Centre on the ground floor, with four tutorial rooms and the building entrance hall.

On the first floor, there is a further large open plan Learning Centre which includes an Art & Design Tutorial room, providing industry standard IT Design facilities. The top floor has a design workshop, open plan art studio, storage room and office accommodation.

In addition a number of the existing areas of the college were subject to extensive refurbishment. This included works to the college cafeteria and also the sports changing room areas. A new lift was also installed in the existing part of the college.

All the works were carried out whilst the college remained operational.
