

## **Holy Cross RC Primary School New Build & Refurbishment Works**

This phased project comprised the demolition of the majority of the existing Infant School and the construction of a new single storey school, together with ancillary playgrounds and sports areas.

The remaining part of the building which consisted of the existing nursery school and sports hall were the subject of extensive refurbishment works to produce a more functional and modern facility.

The existing car parking areas were also extended and additional external works carried out to improve the overall efficiency of the school.

“extensive refurbishment works to produce a more functional and modern facility.”
