

Liverpool Women's Hospital **Internal Rationalisation & Remodelling Works**

This project involved internal rationalisation and remodelling at the Liverpool Women's Hospital. The works were undertaken following a decision to relocate and transfer the maternity facility from Fazakerley Hospital to the Liverpool Women's Hospital.

The main aspects of the works involved the internal refurbishment and alterations to create two new operating theatres, recovery areas and a maternity ward. Additional storage areas were also created.

Through close liaison with all parties, we completed the works whilst allowing the hospital to continue operating with the minimal disruption to their activities.

Contract Title: Internal Refurbishment Works

Client: Liverpool Women's Hospital

Location: Liverpool

Value: £1 million

Contract Period: 23 weeks

“close liaison allowed the hospital to continue operating with minimal disruption to activities”.
