

## Royal Liverpool & Broadgreen Hospital Refurbishment of Isolation Ward 3X

**Ward 3X is the third project successfully delivered by Whitfield and Brown at 'The Royal' in the last 3 years.**

The project comprised the complete refurbishment and remodelling of Ward 3X to create a new 13 bed Clinical Pharmacology Isolation Ward to manage patients with Nora Virus and Clostridium Difficile associated Diarrhoea.

At the request of the client, the contract period was shortened by 4 weeks and the revised completion date achieved.

The works were undertaken within a 'live operational' hospital building and required considerable liaison between our site management team, the design team and the Hospital to ensure that the works caused the minimum of disruption to the operation of the Hospital.

“At the request of the client, the contract period was shortened by 4 weeks and the revised completion date achieved.”

building on our reputation
